

Revolabs Wireless Microphone Systems For Beautiful Conference Rooms

Can't or won't make a hole in your table?

Don't want wires running across your table?

The Revolabs Wireless Microphone Systems have no wires to worry about. PLUS...

Superb Sound Quality

The Revolabs Wireless Microphone Systems raises the audio quality to a professional level, solving participants' number one complaint about conferencing.

Unobtrusive Microphones

The Revolabs Wireless Microphone Systems use Revolabs MaxFlex™ Technology and support all of the Wireless Microphone types, wearable, tabletop, and XLR adapter for handheld microphone. The wireless microphones are small and ultra light, and are also offered in an RF Armor™ version which are impervious to GSM noise from cell phones and PDAs.

Rechargeable, No Batteries

The Revolabs Wireless Microphones are rechargeable and the battery provides eight hours of talk time. A recharge to 85 percent capacity can be attained in about 45 minutes. All Systems include a Charger Base which can be put anywhere there is a standard electrical outlet.

Microphones As "Cool" As The Room

Wireless Microphones allow your board room or conference room to make a statement! Wired microphones require a way of hiding the wires to avoid seeing the mess. If you are looking for a sleek and good-looking and good sounding microphone, look at the Revolabs Wireless Microphone products.
