

Revolabs Wireless Microphone Systems For Flexible Rooms

Unmatched audio performance with wireless convenience brought to the flexible conference room.

The Revolabs Fusion™ Wireless Microphone System is “plug and play” with all phone systems and video-conferencing systems, and has no wires to worry about.

Flexible Tables

Solution: Revolabs Wireless Tabletop Microphone

that you need for that configuration. For example, if you have a panel discussion, choose the directional tabletop wireless microphone to just pick up the voice of the panelists. If you have a moderator, use the XLR adapter by plugging it into any dynamic handheld microphone to make it wireless and rechargeable. If you are having an audio-conference, use the omni-directional tabletop wireless microphone. Full flexibility!

Superb Sound Quality

The sound quality of the system is raised to a professional level, solving participants' number one complaint about conferencing.

Unobtrusive Microphones

The Revolabs Fusion Wireless Microphone System uses Revolabs MaxFlex™ Technology and supports all of the Solo Wireless Microphone types, wearable, tabletop, and XLR adapter for handheld microphone. The wireless microphones are small and ultra light, and are also offered in an RF Armor™ version which are impervious to GSM noise from cell phones and PDAs.

Rechargeable, No Batteries

The Revolabs Wireless Microphone is rechargeable and the battery provides eight hours of talk time. A recharge to 85 percent capacity can be attained in about 45 minutes. The System includes a Charger Base which can be put anywhere there is a standard electrical outlet.

Microphones As Flexible As The Room

Move the tables and chairs into the room configuration that you need. Then choose the types of microphones
