

Revolabs Wireless Microphone Systems For Video Carts

Unmatched audio performance with wireless convenience brought to the portable video cart.

The Revolabs Fusion and Solo Single Channel Wireless Microphone Systems are both “plug and play” with all conferencing systems, and have no wires to worry about.

Superb Sound Quality

The sound quality of the system is raised to a professional level, solving participants' number one complaint about conferencing.

Unobtrusive Microphones

The Revolabs Fusion and Solo Single Channel Systems use Revolabs MaxFlex™ Technology and support all of the Solo Wireless Microphone types, wearable, and tabletop. The wireless microphones are small and ultra light, and are also offered in an RF Armor™ version which are impervious to GSM noise from cell phones and PDAs.

Revolabs Wireless Tabletop Microphone

Rechargeable, No Batteries

The Revolabs Wireless Microphone is rechargeable and the battery provides eight hours of talk time. A recharge to 85 percent capacity can be attained in about 45 minutes. The System includes a Charger Base which can be put anywhere there is a standard electrical outlet.

Easy-to-Use

Wheel the video cart into the room, remove the Wireless Microphone(s) from the Charger Base, and place on the table. Un-mute the microphone by pressing the Mute Button on the microphone and begin the videoconference.
